

## GREAT TEST FEEDBACK

During this year an independent Finnish technical magazine Koneviesti together with their partners has again arranged several tests for different machines. Junkkari products have been in three of them with very good results. In beginning of year, in Koneviesti 5/2011, our J-18JLD dumper trailer was in individual test and received a very good feedback. It was said for example that trailer is light and stable to tow and drawbar suspension works really well.

### Junkkari Patruuna second in tight competition

During the summer six forest trailers and cranes were tested nearby Tampere. Junkkari participated with 5771 hydraulic pilot control crane and 10+ trailer. Results were tight and Junkkari got second place with only 6 points difference to winner. Winning combination was 3300 euros more expensive and therefore better equipped than ours. So with similar specs Junkkari Patruuna could have been number 1. More information from Junkkari or Koneviesti 12/2011.

### Clear win for Maestro Direct

This year it was sixth time when Koneviesti magazine arranged a traditional direct seeding test and the crop this year was broad bean. Junkkari was now participating with the newest seed drill innovation, Maestro Direct. This machine is designed especially for direct seeding also in heavy soils. Now we are in the latest phases of product development and we can start selling it with full speed in autumn 2012. Anyway Maestro Direct got outstanding result by winning this test with 25% bigger yield than next one. More information from Junkkari or Koneviesti 17/2011.

*We wish You Merry  
Christmas and Successful  
New Year 2012!*

**Holidays in Christmas time:**

- Sales and spare parts, week 52
- Production and deliveries, weeks 52 and 1
